### Getting a Place.

Almost every man who has succeeded in establishing himself in the business or professional world is constantly applied to that he may use his influence to secure a position for this or that person, where he may have a chance to earn a livelihood or secure a foothold that may result in earning a livelihood. Every right-minded man is glad to render his service to those who are worthy; and in rendering it he frequently does the future employer as great a favor as the employee, for it is a substantial advantage to a business man to have trustworthy, intelligent and ambitious subordinates. But it is well to remind those who are in search of positions that their wisest course is to improve the first decent opportunity that offers to secure a foothold in the world of self-support. It does not make a very great difference where one starts. If the employee has the qualities that make him valuable the employer will discover it, or if he does not some other employer will. The most fatal obstacle to success is for the employee to render in service what he deems an exact equivalent for his wages, not to take an interest in his work and not to consult his employer's advantage. Such persons are apt to find themselves out of a position, and they are the first to be discharged when economies are imperative. It is well to remember that the value of any position is not to be measured simply by the pay that goes with it, but by its opportunities for advancement, and by the chance that it may directly or indirectly bring the one who holds it into relation with larger and better things.

### August Ladies' Home Journal.

Hamlin Garland, Anthony Hope, John Kendrick Bangs, Harold Rich-ard Vynne, Anna Robeson Brown, "Josiah Allen's Wife," Clara Morris, Kate Whiting Patch and Anna Farquhar are among the half-score of writers of fiction who contribute stories to the August Ladies' Home Journal. The Midsummer Fiction Number of the Journal is in many respects a notable magazine. It has brought together in a single issue some of the most popular story-writers, and the most capable black-and-white artists to illustrate their work. Fiction, of course, predominates, but there are an abundance of timely practical articles, especially appealing to home and family interests and tending to lighten and brighten women's work.

The Rev. Newell Dwight Hillis, D. D., has an interesting article in this issue on "The Diffusion of Happiness Through Conversation," the third of his "Secrets of a Happy Life" series, and Mrs. Burton Kingsland and Emily D. Striebert write of "With the Children on Sunday"—their diversions and instruction; "What Can Be Done With an Old Farmhouse" pictures how an old building may be artistically remodeled at small cost. On two other pictorial pages are shown the most cozy and attractive "Houses in Woods, Valleys and Mountains," and "The Sweetest of Summer Charities" pictures the work of the flower missions in several cities. The latest feminine fancies in dress are set forth in "The Gossip of a New York Girl," and Emily Wight writes of the "Newest Styles in Hairdressing" and "Laces for Dress Trimmings." Mrs. S. T. Rorer's cooking lesson is on "Cold Dishes for hot weather," and Mr. and Mrs. Edward B. Warman's

health talks are on timely themes. For the boys Dan Beard explains how to make "A Backyard Fish Pond." The editorial departments are more interesting than usual, and touch upon every phase of home life. By The Curtis Publishing Company, Philadelphia. One dollar per year; ten cents per copy.

### School Per Capita.

State Superintendent of Public Instruction, Hon. W. J. Davidson, has made up the per capita for each child of school age in the State, which amounts to \$2.70. This is the highest point which has ever been reached except once before, when it was \$2.85.

This is a very gratifying exhibit to the friends of education, and will be a source of special benefit to the hard worked district school teachers.

## NO USE TRYING

## Scott's Emulsion

It is like cream, but will feed and nourish when cream will not. Babies and children will thrive and grow fat on it when their ordinary food does not nourish them.

Persons have been known to gain a pound a day when taking an ounce of Scott's Emulsion. It gets the digestive machinery in working order so that the ordinary food is properly digested and assimilated.

### A New School for Frankfort.

Prof. and Mrs. George F. Winston, late principals of Norfolk College for Young Ladies, at Norfolk, Va., have come to Frankfort with the intention of establishing in our city a select school, of high grade, for young ladies. Prof. and Mrs. Winston are both college graduates, and have had many years experience as teachers and principals of some of the best colleges in the south. They come highly endorsed, not only as people of high social position and culture, but for superior scholarship, executive ability in the management of schools, and scrupulous fidelity in all business relations.

They have rented the Chiles residence, on Second street, and are now fitting it up for their opening in September. Their prospectus will be out soon. We bespeak for them a cordial welcome from the citizens of Frankfort. We need such a school in our city, and now let Frankfort see what she can do for herself by giving Prof. and Mrs. Winston their hearty co-operation.

What seems foolish and absurd has been reduced to a skill and science. We refer to the high wheel dive at the Lexington Horse Show, Fair and Carnival, August 8 to 12. It is performed from a tower 42 feet high, the leap being made into a pool but 10 feet deep. While hazardous, the diver has made many successful leaps before thousands of wondering audiences. It is thrilling in the extreme.
